

GERMANY'S FLEET OF WAR.

FIFTY-ONE VESSELS TAKE PART IN THE NORTH SEA MANEUVERS.

Great Preparations for the Army Evolutions. The Emperor's Health Improved by His Holidays—It Is Said Maseburg, the Commander-in-Chief is Admiring the Evolutions. The Fleet may go to Danzig eventually, but it will not cooperate in maneuvers with the military army. Neither will the night crossing of the River Voge be effected by the Kaiser's flag ship, the *Goeben*, distinguished by having Prince Henry of Prussia as its commander.

The naval maneuvers will be continued in the Baltic. On Sept. 6 the fleet will leave Kiel and will join other vessels concentrating at Swinemünde, where the Emperor, on the yacht Hohenzollern, will watch the evolutions. The fleet may go to Danzig eventually, but it will not cooperate in maneuvers with the military army. Neither will the night crossing of the River Voge be effected by the Kaiser's flag ship, the *Goeben*, distinguished by having Prince Henry of Prussia as its commander.

The plans of the maneuvers of the main army have been altered so as to locate the principal battlefields between Königsberg and Elbing instead of between Elbing and Danzig. The Emperor and Empress and the King of Württemberg will arrive in Königsberg on Sept. 9. They will be welcomed on the Sattler Platz by thirty young women in white, who will scatter flowers and do other conventional things never omitted from such receptions. The Emperor will unveil a monument to the old Emperor, probably completed in the autumn, on the occasion of a political and historical speech. The speech will be followed by the march past of the troops, the veterans, and the civic societies. There will be a banquet at the castle in the evening, a big tattoo by the massed military bands, and a general illumination.

Sept. 6, the Emperor's Army Corps, which the time being is to be commanded directly by the Emperor, will have a grand parade. On the following morning the Emperor will lead the corps away toward Braunsberg to meet the Seventeenth Corps advancing from Elbing.

The end of the Imperial program involves the holding of a reception of the Knights of Hohenzollern at Marienburg Castle. After the reception there will be a dinner. The Emperor, Empress, and King will visit Count Dohna at his Schlosschen Castle on the 10th, when the Emperor will also take the field at the head of his corps. On the 11th the Emperor will lead his corps to the front, and on the 12th he will hold a reception of the Knights of Hohenzollern at Marienburg Castle. After the reception there will be a dinner. The Emperor, Empress, and King will visit Count Dohna at his Schlosschen Castle on the 10th, when the Emperor will also take the field at the head of his corps. On the 11th the Emperor will lead his corps to the front, and on the 12th he will hold a reception of the Knights of Hohenzollern at Marienburg Castle.

Among the guests at the maneuvers will be Goltz Pacha, a German soldier in the Turkish service, and seventeen Turkish officers who have come north to enter the German army. The end of the Imperial program involves the holding of a reception of the Knights of Hohenzollern at Marienburg Castle. After the reception there will be a dinner. The Emperor, Empress, and King will visit Count Dohna at his Schlosschen Castle on the 10th, when the Emperor will also take the field at the head of his corps. On the 11th the Emperor will lead his corps to the front, and on the 12th he will hold a reception of the Knights of Hohenzollern at Marienburg Castle.

After this demonstration, which is sure to turn the city into a scene of confusion, there will be the formal closing of the military season with a parade on the Tempelhof field. The military officials will then return to their headquarters. The Emperor's health is said to be improved by his holidays. It is said that the Emperor's health is improved by his holidays. STOPPING WATER WASTE.

Brooklyn Policeman Makes House to House Notification.

To look at Brooklyn one would hardly think it possible that her average daily consumption of water is 80,000,000 gallons. A water famine is feared there.

Policemen have been notified to warn consumers to waste the water. The order was read by the Captain to the men, and patrolmen were instructed to do their duty even if they had to run or climb two flights of stairs. A genuine Brooklyn policeman is hard to find. Every policeman seems to be detailed to protect pedestrians fromrolley cars when not having a day off. One was finally found who acknowledged that he had other duties. A newspaper was handed to him containing Acting Superintendent MacKellar's order regarding water. He read it carefully through twice, and had begun a third perusal when something suddenly dawned upon him.

"That's right," he said, as he handed the paper back.

"What's right?" he was asked.

"The paper; that's the Captain's orders."

The greatest cause of complaint is that saloon keepers waste the water by allowing water to escape into the street when cleaning the place.

Brooklyn's sewers are said to be cleaner than her streets.

The first violator of the laws of economy discovered yesterday by this particular policeman was a German barkeeper with a bullet-shaped head. His trousers were rolled above his ankles. He stood behind the bar when not having a day off. It was a question whether he was trying to clean the floor of the saloon or whether he was practicing the art of throwing water on pedestrians with a broom. In the latter achievement he was highly successful. But the policeman was as adept a dodger as the barkeeper was a water thrower.

He turned around on the head with the door. "Where's the boss?" he asked the German, who was busy rubbing his head. The latter pointed to the rear room. The proprietor came out and greeted the policeman, who whispered his instructions to the barkeeper, who then turned to the door.

"Good evening, Jim," said the policeman, boldly.

"Is a pretty cheek you have, Mary."

"Are you going to the Hibernian's picnic?"

"Yes, yes," said Mary. "Are you?"

"Ah, yes," said Mary. "Are you?"

"Yes, yes," said Mary. "Are you?"

"Yes, yes," said Mary. "Are you?"

"Yes, yes," said Mary. "Are you?"

"Yes, yes," said Mary. "Are you?"

"Yes, yes," said Mary. "Are you?"

THE DEATH-DEALING GUNS.

ORDNANCE EXPERTS DIFFER AS TO THEIR USEFULNESS.

Navy Officers Say that Their Chief Weakness Is Their Short Range, and That a Ship Could Stand Off and With Her Six-Pounders Destroy Guns and Carriages—Capt. Sampson Says that High Explosives Can Be Thrown by the Use of Powder With Greater Accuracy and Velocity and Sent at a Distance of Six Miles.

WASHINGTON, Aug. 26.—Notwithstanding the wonderful accuracy and rapidity of fire of the dynamite guns at the Sandy Hook tests, the fact that the dynamite guns are a different kind of ordnance officers here as to their true merit as part of the defenses of our seaboard cities. While the navy claims the credit of making the first experiments with these guns, the army holds that it has perfected the gun until there is no longer any doubt of their efficiency, and that the dynamite gun is a different kind of ordnance officers here as to their true merit as part of the defenses of our seaboard cities.

IT WAS FIASCO.

First Failure of the Demonstration Against the Lords in Hyde Park.

LONDON, Aug. 26.—The National League for the Abolition of the House of Lords made a demonstration in Hyde Park today. The demonstration has been much advertised and was expected to be an imposing affair, but it was a fiasco. Hardly 10,000 persons were present. Dispersed among the twelve speakers' platforms, they looked pitifully few.

William O'Brien, Dr. Tanner, and Thomas Curran, all Irish members of Parliament, delivered the principal speeches. They elicited little enthusiasm. William O'Brien wanted the Government that the continuation of the Irish support would depend on its fidelity to the crusade against the Lords and their policy of blocking the way to reform.

While the Conservative journals treat the anti-Lords demonstration as a fiasco, the *Times* contends that it was successful, and estimates the number of persons who gathered round the platforms at 100,000. The *Times* adds that the procession was small because most persons walked to the park independently of the organizations.

Another earthquake in Greece. People in a Panic, Thought It Was Not a Violent Shock.

ATHENS, Aug. 26.—An earthquake shook Corinth, Chania, Zante, and Atlanta yesterday morning. It was not very violent, yet it set the inhabitants of the four districts in a state of panic, as a repetition of the severe shocks felt early in the year was feared generally. The people fled to the fields, where many persons remained, and the houses were left empty. The shock was slight, and as far as is known no property was killed.

The Count of Paris Ill. His Broken Health Excites Grave Fears Among His Friends.

LONDON, Aug. 27.—The Paris correspondent of the *Times* says that members of the Orleans family are going to Stowe to see the Count of Paris, who is suffering from a severe attack of rheumatism. They believe that this may be their last opportunity to see the head of their house.

The Crown of the World. Austria Estimates of Grain Production in 1894.

VIENNA, Aug. 26.—The annual international grain fair will open here to-morrow. The official crop estimates for 1894, as compared with 1893, are given by percentages, and are not so complete as last year, none being received from Russia, and several divisions of the world's crop are given, instead of separate estimates of summer and winter grain. The figures for the world's crop are as follows:

India, 6,232,000 tons of wheat, against 7,740,000 last year. Europe, 390,000,000 bushels, against 382,000,000 last year. America, 2,000,000,000 bushels, against 2,000,000,000 last year. Canada, 25,000,000 bushels of wheat, against 25,000,000 last year.

The crop report for 1894, by percentages, is as follows:

Austria, 100; Belgium, 100; Denmark, 100; Germany, 100; France, 100; Great Britain, 100; Italy, 100; Japan, 100; Russia, 100; Sweden, 100; Switzerland, 100; United States, 100; Venezuela, 100.

Exhibitors Will Grumble. LONDON, Aug. 26.—One hundred and five firms who had exhibited at the World's Fair in Chicago are grumbling at the prospect of exhibiting at the London exhibition. They regretted greatly, they said, that the London exhibition was not in close touch with the exhibitors.

Prospects of the Nicaragua Canal. LONDON, Aug. 27.—The news comments on the quarrel on the Mosquito reservation as affecting the Nicaragua Canal. It holds that the prospects of the undertaking are extremely gloomy. The cost of the canal is estimated at \$100,000,000. The United States would certainly seize the canal, but the United States would certainly seize the canal, but the United States would certainly seize the canal.

Murdered by an Anarchist. PARIS, Aug. 26.—A despatch from Mentone says that M. Hulstet, Secretary to the Army Commissariat, has been murdered there. He was shot in the back as he was entering his house. The murderer is supposed to be an anarchist, who took revenge for the recent raid made by the police upon his comrades.

Two of the Prince of Wales's Crew Drowned. LONDON, Aug. 26.—The dining of the Prince of Wales's court Britannia capsize today in Portland Roads and two of the crew were drowned.

Fell From the Circus Train. The Showmen's Cook Found Dying at the Side of the Track.

The engineer of a special train which was running slowly on the Long Island Railroad, just east of Jamaica, late Saturday night heard a cry from the side of the track. He stopped his train, and the crew made a search with lanterns. They found a man close to the track with both legs out of the car. The man was up with one of the cars and his wounds bound up with pieces of cloth to prevent his bleeding to death.

He was able to talk and said his name was Michael McKeon, and some of the details of his life. The show was returning to Long Island City to be transferred to New Jersey. The circus train was with it, and the man was found on the side of the track.

At Long Island City an ambulance from St. John's Hospital was called to take the man to that institution. While the surgeon was dressing his wounds in a rambling way, he frequently requested one of the trainmen to take him to the hospital. He was 40 years old and resided in Providence, R. I.

Boasted of His Luck. A String of Fish, a Blowgun, and a Cripple.

BATH, Aug. 26.—If nine-year-old Freddy Clark of Brockport had been over-proud of his catch of fish one day last week he would have two legs now, and little Sammy McDonald would not be in the depths of despair. Freddy was coming home from fishing. He had nine fish as big as his head, and a blowgun, and a cripple.

He was able to talk and said his name was Michael McKeon, and some of the details of his life. The show was returning to Long Island City to be transferred to New Jersey. The circus train was with it, and the man was found on the side of the track.

TRIED TO KILL THE WIDOW.

A CRABBY GERMAN COACHMAN'S FOMENTING LOVE.

Andrew F. Schinkling, a German coachman, 36 years old, was employed until December last by Christian Claus, a lithographer, who lived at 940 Bushwick avenue, Brooklyn. He became infatuated with Mrs. Claus, and, after the death of her husband, in April, annoyed her with his attentions. Three days after the funeral of Mr. Claus, Schinkling went to the house of the widow, who is young and well to do, and asked her to marry him. He was put out by the servant.

Then he wrote letters to the widow. In one of them he said that he knew she loved him, because, in a dream, he had seen her fall on her knees at his feet and implore him to flee with her to some spot where they could forever be happy. Mrs. Claus paid no attention to these letters. For a time nothing was seen or heard of Schinkling, and Mrs. Claus was under the impression that he had left the neighborhood. While she was out for a walk with her pet dog, Nellie, and a servant girl, about two months ago, Schinkling, who had been watching her, followed her, and when they were alone, he asked her to marry him. She told him to get out of her house, and he did so.

He walked home with her, however, and at the gate asked her again to go away with him. Mrs. Claus said she would not do so, and he threatened to kill her. She called the police, who took her to the hospital. Schinkling was arrested and is now in the house several times after that, but wasn't let in. He recently sent two letters to Mrs. Claus, in which he said he would kill her and her children.

Mrs. Claus, who was up stairs and had overheard Schinkling, sent for a policeman, who arrested him. He was taken to the police station, and he was released. He was released, and he was released.

On Saturday Schinkling got into the house of the French steamer La Touraine, and asked Mrs. Claus to go away with him. She refused, and he threatened to kill her. She called the police, who took her to the hospital. Schinkling was arrested and is now in the house several times after that, but wasn't let in. He recently sent two letters to Mrs. Claus, in which he said he would kill her and her children.
